

Addendum

12th March 2015

In light of the amended population figures¹ issued by Winchester City Council in December 2014, readers should note that the increase in the Over 75 age range is now projected to be 364 or a 55% increase. (The original report indicated an expected near doubling of this age group.) The current projection will represent 16% of the Alresford population in 2031, which is in line with the national average.
